

# SHUTTLE FIRE DOOR RETAINER

## PRODUCT CODE

**MDR-6000**

## DESCRIPTION

Shuttle is a wireless fire door retainer which legally holds open the fire door until the fire alarm sounds.

It is installed on the face side of the fire door. Once installed simply select the “learn alarm feature” and set off your fire alarm for approximately 10 to 20 seconds, Shuttle will then learn your fire alarm and activate. Once the unit has been configured, press down the plunger at your chosen door angle.

## FEATURES

- Listens and learns Voice, intermittent and continuous fire alarms - (only wire free door retainer to close to voice)
- 10-20 seconds reaction time for learning alarm and releasing
- Basic listening - reacts to any sound above 65db - no alarm sounding needed - ideal for situations where alarms can not be set off.
- 24 month battery life
- Night time release facility
- Activation log (stores upto 50 actions)
- Slimline design
