

RIU REMOTE INDICATOR UNITS 24VDC

PRODUCT CODE

PA-1004

- Direct fit to a single gang deep back box
- Circular flush mounted version available without text
- Text is available in other languages
- Custom legend available on request
- IP66 weatherproof version available

DESCRIPTION

The RIU unit is used to give a remote indication of the status of a single, or groups of, fire detectors in alarm state by utilising an LED with a wide area of illumination and high on/off contrast.

The units are compatible with the majority of conventional and addressable systems and can also be used for security and process control applications.

The standard version is a single gang flush mount unit, with 'Fire Detector Operated' text and also available with a deep back box for surface mounting.
