

Go^{*}

The powerful, flexible,
single-loop fire panel

Go

The powerful, flexible, single-loop fire panel

Designed to be fast to fit, quick to configure and easy to use, Go saves install time whilst bringing you complete peace of mind that your single-panel site has the highest levels of fire protection.

Offering cost-effective access to popular premium features from our MxPro 5 range in a simpler, non-networkable format, Go provides powerful protection for a wide range of smaller sites.

Packed with future-proof technology and flexible features – including false alarm management, built-in zonal LEDs and a handy service tool – Go's ready to become your Go-to!

Building a safer future

Advanced – Made in the UK. Trusted around the world

At Advanced, we're committed to building a safer future. We create fire protection and life safety solutions that protect people and property in more than 80 countries across the globe.

Our products are shaped by decades of research and development expertise as well as ongoing investment in new technologies. This ensures they provide years of high performance and reliability – for ultimate peace of mind.

Everything we deliver is rigorously tested and approved to exacting quality standards – which is why Advanced products are trusted by customers the world over and synonymous with quality, performance and ease of use.

Advanced headquarters, Newcastle, UK

We understand that few fire protection challenges are the same, so as well as our mass-customised ranges, we also offer fully-customised solutions. This flexibility gives you complete control over the functions, format and finish of products to suit your site's unique specification.

We are dedicated to providing excellent service and have an international network of offices and agents to help you access sales support with ease – wherever you are in the world. In addition, our

training and technical services are free of charge to all our direct customers and consistently rated as excellent.

For added reassurance, Advanced is part of the safety sector of FTSE 100 company Halma plc. This global group of life-saving technology companies has a clear purpose to grow a safer, cleaner, healthier future for everyone, every day.

Your new 'Go-to' solution from Advanced

Go

- is the new-generation, single-loop fire alarm control panel from Advanced.
- brings you easy, cost-effective access to popular premium features from our MxPro 5 range in a simpler, non-networkable panel.
- is the ideal solution for all your small to medium-sized sites where networking's not needed, but quality, performance and ease of use are.

Standalone fire protection for complete peace of mind.

Easy to install and use

Time is money, so we've built in a host of features that make Go a breeze to install, configure and use.

- An easy-fit chassis and unique door design ensure installation is fast and fuss-free
- Familiar controls and menus mean there's no lengthy learning curve
- A new, intuitive config tool makes setup quicker and easier than ever
- A powerful design checker allows you to prove your system will work without visiting site
- If you do need support, our highly rated technical services team's got your back with advice, tips and training.

Feature-rich and flexible

We understand that small sites aren't always simple, so we've packed Go with flexibility to give you the best of all worlds.

- A wide range of cause-and-effect programming to suit your site
- Comprehensive false alarm management and reduction options to minimise unwanted alarms
- Enhanced diagnostics for fewer faults, faster fixes and better performance
- 15 zonal LEDs as standard for BS 5839 compliance without the need to buy a separate LED zone card
- Compatibility with three leading detector protocols for greater design and maintenance freedom plus wired and wireless versatility
- A choice of two panel address sizes so you only buy the capacity you need.

Fast and efficient

Go is designed with speed and efficiency in mind.

- Built-in peripherals including USB, RTC and ethernet ports
- Latest microcontroller technology ensure the CPU operates nine times faster than the MxPro 4.

Ready for you now... and for the future

We understand that fire protection solutions need longevity.

- Go's state-of-the-art technology ensures high performance today – and for years to come
- Ethernet on board means you'll soon be able to monitor and manage Go remotely* via the Cloud – for added convenience and peace of mind.

**Go is compatible with our AdvancedLive remote management system in development. For further details, contact your sales representative.*

Go* features and benefits

Anatomy of the Go panel

1 High-resolution, high-contrast, graphical LCD display backed by high-speed microprocessor technology operates 9x faster than MxPro 4.

2 Integral zonal LEDs for:

- instant panel identification of alarm locations
- automatic compliance with BS 5839 without additional zonal LED card cost.

3 Tactile keypad allows simple click-and-select programming for faster engineer configuration and simple end-user operation.

4 Two performance options with different configurable address limits for greater site-specific flexibility – look out for Go or Go+ on the panel fascia.

5 Approved to EN 54 Parts 2 & 4 by FM Approvals.

6 Innovative door hinge for quick removal and easier installation.

Multiprotocol support – Apollo, Hochiki, Argus – for the freedom to choose the right solution for your site, without costly maintenance tie-ins.

Installer-friendly auto-learn, loop detection and on-board scope for faster trouble-free setup.

500 fire and 5000 general event logging with advanced diagnostic precision to aid installation and fault-finding.

15 integral zone LEDs ensures compliance with BS 5839, plus up to 35 additional software indication zones.

Two on-board sounder outputs, three on-board relay outputs.

Start from battery button

Optional 3 monitored input/outputs for fire/fault routing (with P-Bus adaptor and routing card) for full EN54 compliance when connected to an alarm receiving centre.

USB type B port for quick, easy PC connection.

Ethernet port and digital ready for cloud connection via AdvancedLive.*

**AdvancedLive is our cloud-based remote fire system management solution providing convenient, real-time access to fire protection data via mobile, tablet and PC from any location. To register your interest, contact your Advanced sales representative.*

Our easiest configuration software yet

Our new ConfigTool, supported by Go, is clear, intuitive and makes setup fast, flexible and fuss-free.

Pre-installed USB device drivers

The installer automatically adds the USB device drivers to Windows, so you don't have to. This means you can connect your PC to the Go panel and begin communication straight out of the box.

Improved user interface

We've updated the user interface with speed and efficiency in mind. You can access most operations from the program menu, along with a description of each function. We've also changed many of the editors to make best use of screen space, and to support multi-select, reducing design setup time.

Fast communication

Go transfers configuration settings to/from the panel at over 300 times the speed of other panels.

Integration of device and input/output editing

You can see all the devices fitted by address in a grid layout. Simply by selecting an address, you can configure all device inputs and outputs from the same screen.

A range of specially designed features bring you a host of time-saving benefits:

Go

Cause and effect checking

Cause and effect checking is greatly improved, making it possible to prove a design and correct any mistakes without actually having to go to site.

Device	Unit	Unit Address	Sub-Address	Description	Panel	Location	Output State
On-Board	1	1	0	Panel SCC-A	00	Scanner A	1
On-Board	1	1	1	Panel SCC-B	00	Scanner B	2
On-Board	11	1	0	Panel SE-C	00	Relay C	125
On-Board	11	2	0	Panel SE-D	00	Relay D	125
1	2	2	0	On-board Optical v Scanner Base 10000-400 v 40000	1	Relay Base 1	124
1	3	3	0	On-board Optical v Scanner Base 10000-400 v 40000	1	Relay Base 1	124
1	12	1	0	MPR Panel Input Output (10000-400)	1	Relay Base Release	125

Fast loading and saving

The near instant loading and saving of files saves you time and money.

Design checker

A sophisticated design check takes place on upload to highlight common problems. This stops you uploading designs with major issues, saving you fault finding time. You can also run a more in-depth design checker at any time to see information about any problems and warnings that arise.

Quick support

As intuitive as the ConfigTool is, you may occasionally need a reminder about its functions, so we've included a user manual in the program menu that you can access anytime.

Multiprotocol flexibility

We've designed Go to give you plenty of protocol options and choice.

Compatible with Apollo, Hochiki and Argus, our multiprotocol approach:

- puts you in control of which devices you use to best suit the needs of your site.

- ensures you have the freedom to decide – where you buy, who installs and how you maintain – your system. No costly, inconvenient tie-ins.

- ensures you're in charge of your fire system budget – now and in the future.

We've added an extra layer of flexibility too. Go is available in two configurable address sizes, so you only pay for what you need.

The **Go** panel is ideal for the smallest sites of up to 50 addresses.

The **Go+** panel allows you the maximum number of addresses for your chosen protocol (see table).

Number of addresses by panel and device protocol

	 XP95, Discovery	 Vega	 ESP
Go	50	50	50
Go+	126	240	127

Let Go* of false alarms

Verification

Investigation

Reduction

AlarmCalm Complete False Alarm Management.

Go gives you access to the power and flexibility of our AlarmCalm false alarm management and reduction software.

This highly effective system lets you design a solution around the needs of your specific site and can radically reduce the disruption, inconvenience and costs associated with unwanted alarms.

AlarmCalm uses fast hardware, powerful software and optional, intelligent loop devices to build a total solution to false alarms that's versatile and easy to configure.

The AlarmCalm Button is an intelligent verification device that can be installed on the loop and works with the AlarmCalm software to allow occupants to acknowledge a fire alarm signal locally, if they believe it has been triggered accidentally.

The AlarmCalm Button

Features:

- **Versatile cause and effect**
In-depth control over alarm verification and investigation delays to outputs.
- **Customised management for any site**
Divide your building(s) into 'building areas', each with quick-to-apply unique or group false alarm management settings. 50 building areas per panel.
- **Unlimited points**
No restriction on the number of points in a building area and configurable by point.
- **Global acknowledgement**
Panel inputs can be programmed to manage verification and output delays.
- **Full event log**
All verification and output delays recorded in panel event logs.
- **Flexible verification**
Set verification by building area, day/night, on/off, change verification times, verification by second device or device mode change.
- **Multiple verification inputs and outputs**
Inputs can include optical, heat and multisensors, callpoints and AlarmCalm Button or other input modules. Outputs can be sounders, beacons and relays etc. Sounder ring styles can be configured.
- **Failsafe operation**
Total control over verification times. Users can only extend verification once. Set maximum number of areas in verification before full fire is signaled.
- **Easy management of outputs**
Output delays are handled in exactly the same way as verifications, making setup very simple.

Go^{*} for powerful, flexible service reporting

Go brings you full access to all the features and benefits of our popular ServiceTool.

Simply connect your PC to the fire panel using a USB cable and you'll be able to:

- Download service reports
- Inspect device history
- Keep track of service schedules
- Demonstrate proof of servicing.

You can filter your data to suit your exact needs according to:

- Zone number
- Device type
- Loop number.

You can also:

- Create custom categories containing specific devices tagged for quick identification
- Customise reports to show the information you need and export them as PDF, Excel or HTML files.

Get quick and easy access to a panel's complete device data – both historic and real time via USB cable.

- No more time-consuming manual data extraction and reporting.

View a panel's complete device history, including when it was installed and last:

- Activated
 - Disabled
 - Tested
 - Enabled
- Provides proof of a panel's status at any given point in time e.g. on commissioning.
 - All data is stored, so none is overwritten and lost.

Get an 'at-a-glance' view of the current status of a panel's devices.

- Easily spot devices that haven't been tested so you can check the accuracy of third-party servicing reports.

Use customised data filters to quickly spot how frequently particular devices go into fault.

- Helps you to focus on potential trouble spots and ensure they are checked during servicing.

Identify devices not recently checked and highlight them with flags so they're prioritised on the next service visit.

- Keep on top of service schedules so you never miss a deadline again.

Choose the data you want to extract from the panel using a wide range of filters.

- Create completely customised reports in PDF, Excel and HTML formats that are easy to use, send, store and compare.

View drift data, real time temperature and analogue values.

- Predict which devices are becoming contaminated so you can clean/replace them before they cause false alarms.

Good to Go^{*} – easy solutions to common problems

Packing power and flexibility into a non-networkable, single-loop panel, Go's additional features make it the ideal solution for a wide range of smaller, single-panel sites.

Sector	 <p>Retail</p>	 <p>Hospitality</p>	 <p>Commercial/Industrial</p>	 <p>Health/Beauty</p>	
Typical location	<ul style="list-style-type: none"> - Smaller privately-owned shops - Branches of national retail chains 	<ul style="list-style-type: none"> - Bars - B&Bs - Guesthouses - Hotels - Restaurants - Cafés 	<ul style="list-style-type: none"> - Branches of national hospitality chains 	<ul style="list-style-type: none"> - Small offices - Industrial units - Car dealerships - Utilities (remote sites) 	<ul style="list-style-type: none"> - Doctors' surgeries - Dental surgeries - Beauty salons - Hairdressers
Benefits	<p>Cost-effectiveness – choose Go or Go+ address capacities to suit your site</p>				
<p>Quality and reliability – premium MxPro 5 features in a single-loop panel</p>

Advance your expertise for Advanced peace of mind

We understand it's hard to balance the day job with keeping on top of product and legislative changes.

That's why we've carefully designed our training to make your life easier.

Whether you need a quick product overview or hands-on engineering tips; early warning of new regulations or detailed guidance on the best ways to ensure compliance, our expert team's here to help.

You can choose from a wide range of modules covering our fire, evacuation and lighting ranges.

Courses run regularly both online and in-person and we can also customise training to suit you.

To find out more about the training available, please email techsupport@advancedco.com

or call

0345 894 7000

to request one of our training brochures or discuss your needs.

Building a safer future

Go ^{*}technical support

Advanced ^{*}360

When you register for a free Advanced360 account, you get instant free access to our team of experienced industry experts and engineers, all based in our head office and manufacturing facility in Newcastle-upon-Tyne.

Online and telephone support can help with installation or maintenance, fault finding and any other technical issue.

You'll also gain access to a wealth of online information, from 'how to' videos to datasheets and detailed product manuals. In addition, you'll receive our dedicated monthly newsletter, packed with useful hints and tips.

Services include:

- **Technical support** – available during UK office hours by phone and online from one of our experienced technical support engineers
- **Support history** – open and view your live support tickets and see your full support history, enabling you to refer back to previous advice where required
- **Training** – view and book training slots (direct customers only), and download your training certificates at any time
- **Software** – download software and save your software packages by installation/site
- **Literature** – download manuals, specifications, approved partner certificates, technical information and more
- **Warranty certificates** – download warranty certificates for your sites.

Fast-track your fire safety knowledge with our CPDs

We're committed to building a safer future by developing fire and life safety equipment that delivers performance, quality and ease of use.

But that's just one part of the picture. Thoroughly understanding relevant, standards and best practice are vital too.

Our regular, third-party-accredited CPD sessions help fast-track your knowledge and provide peace of mind that you're on top of the latest regulations.

Go technical specifications

Technical specifications	
Part Numbers	Go1, Go1V, Go1+, Go1V+
Enclosure	Steel IP30 RAL7035
Dimensions	H x W x D mm 345 x 345 x 87
Weight (excluding batteries)	4Kg
Temperature Range	-5 C to 40 C
Humidity (RH)	95% max
Cable Entries (20mm knockouts)	14x top
AC Supply	220-240V, 50 – 60 Hz, 1.0A max
Safety	EN62368-1, Class 1, Pollution Degree 2, Overvoltage Category II
Battery Capacity	24V 4Ah Internal (min) 24V 7Ah Internal (max)
Charging Current	0.35A Temp Compensated
Deep Discharge Cut-off	19.5V
Power Supply	On-board 24V DC, 1.5A High Efficiency Off-Line Switched Mode
Power Supply	18.0V – 28.0V
Ripple (Vpkpk)	Up to 1.0V
Max Battery Ohms	1.8Ω 0.1Ω
I _{max} (a)	1.15A
I _{max} (b) ²	1.5A
Number of Fire Zones	50 max
Number of Loops	1
Loop Current ³	500mA max
Protocols	Apollo (XP95, Discovery); Hochiki ESP; Argus or Axis EN
Sounder Outputs ³	2 x 1A Programmable (1A total)
Relay Outputs	3 x1A 30VAC/DC (max) to 10mA 5V (min) Programmable
Auxiliary Output ^{3 4}	24V DC, 100mA (with GOP-001 Fitted)
Display	LCD White backlit 240 x 64 Graphical LCD
Programmable Inputs	1 x Key Switch, 1 x monitored
USB	USB type B interface for PC connection
Network	None
Ethernet	10-Base-T, 100-Base-T
Event Log	5000 Event and Diagnostic + 500 Fire

1 Minimum/maximum specifications for the AUX and Sounder outputs. Detector Loop voltage is not dependant on AC or battery voltage.

2 Only applicable if the panel is configured to turn off the charger in alarm. Otherwise I_{max}(b) = I_{max}(a).

3 Total output current from panel not to exceed I_{max}(b) less internal power consumption.

4 Aux supply tracks a maximum of 0.5V below battery terminal voltage when no mains supply is available.

Maximum Addresses		
EN54-2: not more than 512 detection devices per panel.
