

VOICE MESSAGE CONTROLLER (VMC)

The VMC interface allows conventional sounder circuits/NACs to be used to broadcast 7 different messages via multi-message Fire-Cryers.

The on board PSU can be used to power addressable Sounder Circuit Controllers (Contact us for Application notes on each protocol)

Messages can be trigger via the keypad on the panel or via inputs on the PCB.

Each panel comes as standard with 2 sounder circuits but can have up to 8 circuits using the ZEP. PSU sizes are 2, 5 and 10A.

Specification

PSU rating	2, 5 and 10A
Number of Circuits	2 as standard, 8 with ZEP
Dimensions	M2 = 310(H) x385(W)x 90(D)mm M3 = 520(H)x385(W)x110(D)mm

Part Numbers - Message Controllers

VMC/01/02/02/M2	VMC with Keypad and 2.5A PSU
VMC/01/01/02/M2	VMC with Keypad, ZEP and 2.5A PSU
VMC/01/02/05/M3	VMC with Keypad and 5.25A PSU
VMC/01/01/05/M3	VMC with Keypad, ZEP and 5.25A PSU
VMC/01/02/10/M3	VMC with Keypad and 10A PSU
VMC/01/01/10/M3	VMC with Keypad, ZEP and 10A PSU

Features

- / Any state of alarm can be broadcast
- / Keypad VMCs have green LED status on the Facia
- / Solution for phased and staged evacuation
- / Allows for Lockdown alarms on the Fire system
- / All sounder and strobes fully synchronised
- / Synchronisation across multiple panels
