The 34BNC is a fixed 3/4-wave UHF aerial engineered for use with the PageTek Pro paging system. Designed to provide dependable signal coverage across commercial and industrial environments, it offers an effective solution for fire alarm paging, emergency notification, and critical communication systems.

## Key Features

- 3/4-wave fixed aerial design
- BNC bayonet-style connector for quick, secure installation
- Optimised for Scope PageTek Pro transmitters
- Suitable for most commercial and industrial premises
- Lightweight, durable construction
- Technical Specification

## Specification

Part Code: 34BNC

Aerial Type: 3/4 Wave Fixed Aerial

Connector: BNC

Compatibility: PageTek Pro Systems

Installation: Fixed Mount

Additional aerials are available for installations requiring enhanced coverage or external mounting:

Lightweight ½-Wave Dipole Aerial, Available with 5-metre feeder cable.

Half-Wave Folded Dipole Aerial, Available with 5, 10, or 15-metre feeder cables and Wall-mount clamp and Pole-mount clamp options

These alternative aerials are suitable for installations where improved antenna positioning or extended cable runs are required .
